Add 'KA' after part number for Keyed Alike, and key number if known.

Available master keyed, extra long shackle and colour coded to special order

Hockey puck padlock

When used with either Zone Z4000 or Z4250 hasp and staple, the Z500 series padlock's hardened steel shackle is fully protected. This feature, combined with a round, hardened steel body, provides very high resistance to abuse attack.

The secure bolt locking mechanism is controlled by a pick resistant 6 pin cylinder. This cylinder is rekeyable/interchangeable thus enhancing key control management. This padlock is protected by an attractive satin nickel plate finish.

Part Number	Description	Dimensions		
		Shackle Dia.	Overall Dia.	Depth
Z500	Hockey puck padlock, carded	10mm	72mm	32-38.5mm

Zone closed shackle brass padlock

The hardened steel shackle is held in the locked position by a double ball locking mechanism. The lock is protected by a 5 or 6 pin key system with a key retention feature in the unlocked position.

The shackle configuration prevents attack by conventional bolt cutters and, when used in conjunction with a security hasp & staple, provides good levels of security.

Part Number	Description	Dimensions			
		A	B	C	D
Z100-2	50mm carded	50mm (2")	19mm	21mm	8.7mm

Zone open shackle stainless steel padlock

Constructed from high quality stainless steel, which makes them ideal for use in marine or other corrosive environments.

In addition, stainless steel is tough and provides high resistance to abuse attack. The toughened shackle is held in the locked position by a double ball locking mechanism.

The lock is protected by a 5 or 6 pin key system, with a key retention feature in the unlocked position. In summary, this is a tough attractive padlock that will retain its performance and finish, even in hostile environments.

Part Number	Description	Dimensions			
		A	B	C	D
Z200-2	50mm carded	50mm (2")	20.5mm	28mm	9.5mm

Zone closed shackle stainless steel padlock

Constructed from high quality stainless steel, which makes them ideal for use in marine or other corrosive environments.

The closed shackle configuration provides protection against attack by bolt cutters and, when used in conjunction with a security hasp & staple, provides high levels of security.

Also the tough, robust properties of stainless steel provides high resistance to abuse attack. The toughened shackle is held in position by a double ball locking mechanism. The lock is protected by a 5 pin key system with a key retention feature in the unlocked position.

In summary, this is a highly durable padlock that will retain its performance and good looks even in hostile environments.

Part Number	Description	Dimensions

ERA Invisible mortice locks

The ERA Invincible Range of British Standard 5 Lever Locks are certified to BS3621:1998 and fully meet insurance company requirements for thief resistance.

The Invincible Dead Lock features an in-line arrangement of the bolt, bolt stump and levers when the bolt is in the locked position. This is a continuous and near-impregnable line of metal to resist jemmying. Hardened steel rollers in the bolt resist hacksawing.

The Invincible Sash Lock features a latch which can be easily reversed without having to remove the cover. The advanced design of this lock is such that critical dimensions for fixing such as backset and hole centres are similar to existing ordinary sash locks allowing easy replacement with minimum cutting and drilling of doors.

Nightlatches

ERA BS 3621:2004 high security nightlatch

The new British Standard High Security Nightlatch now gives customers an even wider range to choose from. It complies with BS3621: 2004 and falls in line with the new European Standard (BS EN 12209).

This product is ideally suited to glass panelled wooden doors. It's designed with an internal lockable handle, offering added security against forced entry. Operation is by key from the outside and by a handle from the inside. The Nightlatch is available in clam packed and boxed packaging.

ERA Double locking nightlatches

The ERA Double Locking Nightlatch is available in both 40mm and 60mm backset, designed to replace most existing front door locks. The product is ideally suited for solid and glass panelled wooden doors, as it has been designed with an ergonomic internal locking handle offering added security against forced entry.

The main lock bolt is "automatically" deadlocked when the door is closed, preventing the main bolt being retracted by a credit card. The inside handle can be deadlocked by an anti-clockwise turn of the key from the inside so securing the lock against forced entry. The bolt can be held in the withdrawn position (only) with the use of the snib feature.

ERA Traditional door locks

The ERA Traditional Door Lock has been designed to replace most existing front door locks, providing added security to new exterior and interior doors. The lock is suitable for left or right handed operation, inward or outward opening doors. A simple snib button deadlocks the latch from the inside. The Traditional Door Lock is available in brass or green finish, and has a choice of brass or satin finish cylinders, supplied with two cut keys.

ERA Digital Door Locks

ERA Codemaster digital door lock

The New ERA Codemaster has been enhanced with a new anti picking system, reinforced backplate, a metal latchbolt and improved fixing posts.

ERA Codemaster is a fully mechanical push button lock, suitable for regulating access in a variety of commercial, industrial and domestic applications. No keys or wiring required.

The lock is unlocked from the outside only through correct input of the user code and from the inside using an easy turn handle. Codemaster locks automatically on the spring latch bolt when the door is closed.

ERA Security bolts and ancillaries

The ERA Thumbturn is permanently fixed to the door in conjunction with a door security bolt. It is easily located in the event of an emergency and allows privacy when used on internal doors. It is also suitable as a security measure for cupboards and internal doors. It is available individually as a replacement for a key where a security bolt is already fitted. The ERA Easi-Turn and Door Security Bolt is permanently fixed to the door, but because of its large triangular shape allows easy gripping and is especially suitable for the elderly, the visually impaired and the less able. It is available as a complete kit with Easi-Turn and Security Bolt or as a replacement for the key or thumbturn where a security bolt is already fitted.
